

THE NOISE AROUND ACOUSTICS

Approved through IDCEC for .1 credit hour

***AIA can self-report** (note that HSW will not apply for AIA if they self-report) ***All courses approved for CEU credit by IDCEC is automatically accepted by ASID, IIDA and IDC.**

Basic Description: This CEU explores the changing world of acoustics. Evolutions in the built environment are creating an increased need for sound control. Mounting evidence shows that the benefits of adequate acoustics can have rippling positive benefits on occupants. In this one hour presentation, we will explore the changing world of acoustics and how it is translating to tangible benefits in corporate, healthcare, educational, and hospitality spaces.

Learning Objectives:

- **Objective A:** Understand history, definitions, and baseline criteria for acoustics
- **Objective B:** Demonstrate the positive impacts of acoustics in corporate environments
- **Objective C:** Demonstrate the positive impacts of acoustics in education environments
- **Objective D:** Demonstrate the positive impacts of acoustics in hospitality environments

Audience Information: This CEU is intended to be delivered to architects & designers

Mode of Delivery: In Person

Classification of Learning: Basic

Designation: HSW
