

INTEGRATED CEILING & LIGHTING SOLUTIONS

How does integrated lighting affect ceiling design?

- ▶ LED Lighting
- ▶ Linear Lighting
- ▶ Cove Lighting
- ▶ Downlighting

This course will help you understand why ceiling and lighting integration is important on projects and how it can save design time, installation time, and benefit your overall design intent and vision.

See how creating ceiling and lighting solutions through early collaboration in the design process ensures quality finishes and results during construction. You will learn to identify where pre-engineered ceiling and lighting integration can be used to enhance design, while understanding how they can also help to save design and installation time.

By the end of this course you will understand how to implement new pre-engineered ceiling and lighting integrated solutions into your ceiling design to achieve your design intent while saving money and reducing RFIs.
